Clinical Skills

Communicate effectively with patients, their families and members of the health care team. Obtain a comprehensive and/or focused medical history on patients of all categories.

- 1. Perform physical and mental status examinations on patients of all categories appropriate to the patient's condition.
- 2. Document pertinent patient health information in a concise, complete and responsible way.
- 3. Select appropriate investigations and interpret the results for common and important diseases and conditions.
- 4. Recognize and communicate common and important abnormal clinical findings.
- 5. Develop a problem list and differential diagnosis based on the history, physical findings and initial investigations.
- 6. Apply effective problem solving strategies to patient care.
- 7. Perform routine and basic medical procedures.
- 8. Provide patient education for all ages regarding health problems and health maintenance.
- 9. Identify individuals at risk for disease and select appropriate preventive measures.
- 10. Recognize life threatening emergencies and initiate appropriate primary intervention.
- 11. Outline the management plan for patients under the following categories of care: preventive, acute, chronic, emergency, end of life, continuing and rehabilitative.
- 12. Continually reevaluate management plans based on the progress of the patient's condition and appraisal of current scientific evidence and medical information.
